## The AI Forecaster: Machine Learning Takes On Weather Prediction

*A novel approach to weather forecasting uses convolutional neural networks to generate exceptionally fast global forecasts based on past weather data.*

## Boosting Weather Prediction with Machine Learning

*WeatherBench is a data set compiled to serve as a standard for evaluating new approaches to artificial intelligence-driven weather forecasting.*

## IBM and NASA Collaborate to Research Impact of Climate Change with AI

*New IBM Foundation Model Technology Leverages NASA Earth Science Data for Geospatial Intelligence*

Feb 1, 2023

# Machine Learning Improves Weather and Climate Models

*New research evaluates the performance of generative adversarial networks for stochastic parameterizations.*

# During the recent year the progress has been very fast in machine learning for weather prediction, for example:

Examples to be used here:

- FourCastNet (NVIDIA) is fully open
- PanguWeather (Huawei) is open for non-commercial use

Both forecasts are trained on ERA5

$$X(T) = X(0) + \int_0^T M(t) dt$$

In all experiments below, we have initialised both PanguWeather and FourCastNet from ECMWF initial conditions.

# It poses a lot of questions!

Can they do genesis of extra-tropical cyclones from baroclinic waves?

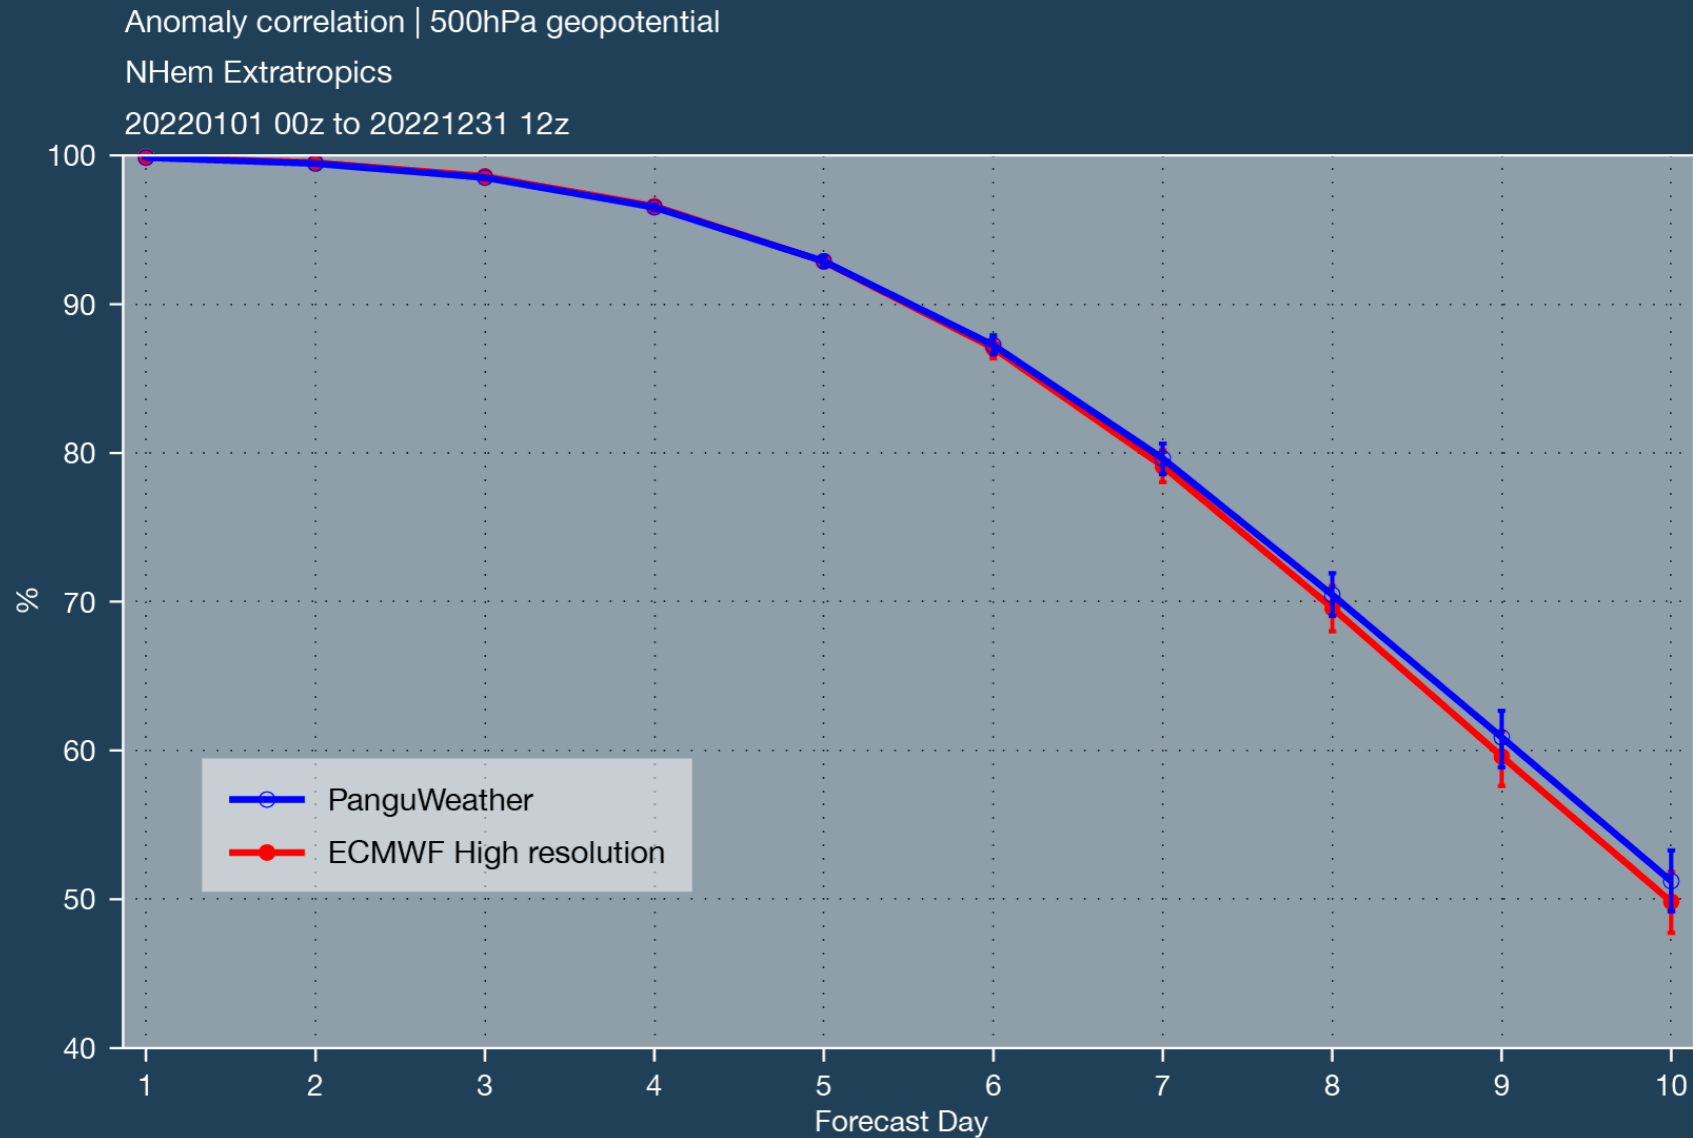

What about (unseen) extremes?

Tropical cyclones?

Do they produce similar error growth?

Can it generate a reliable ensemble?

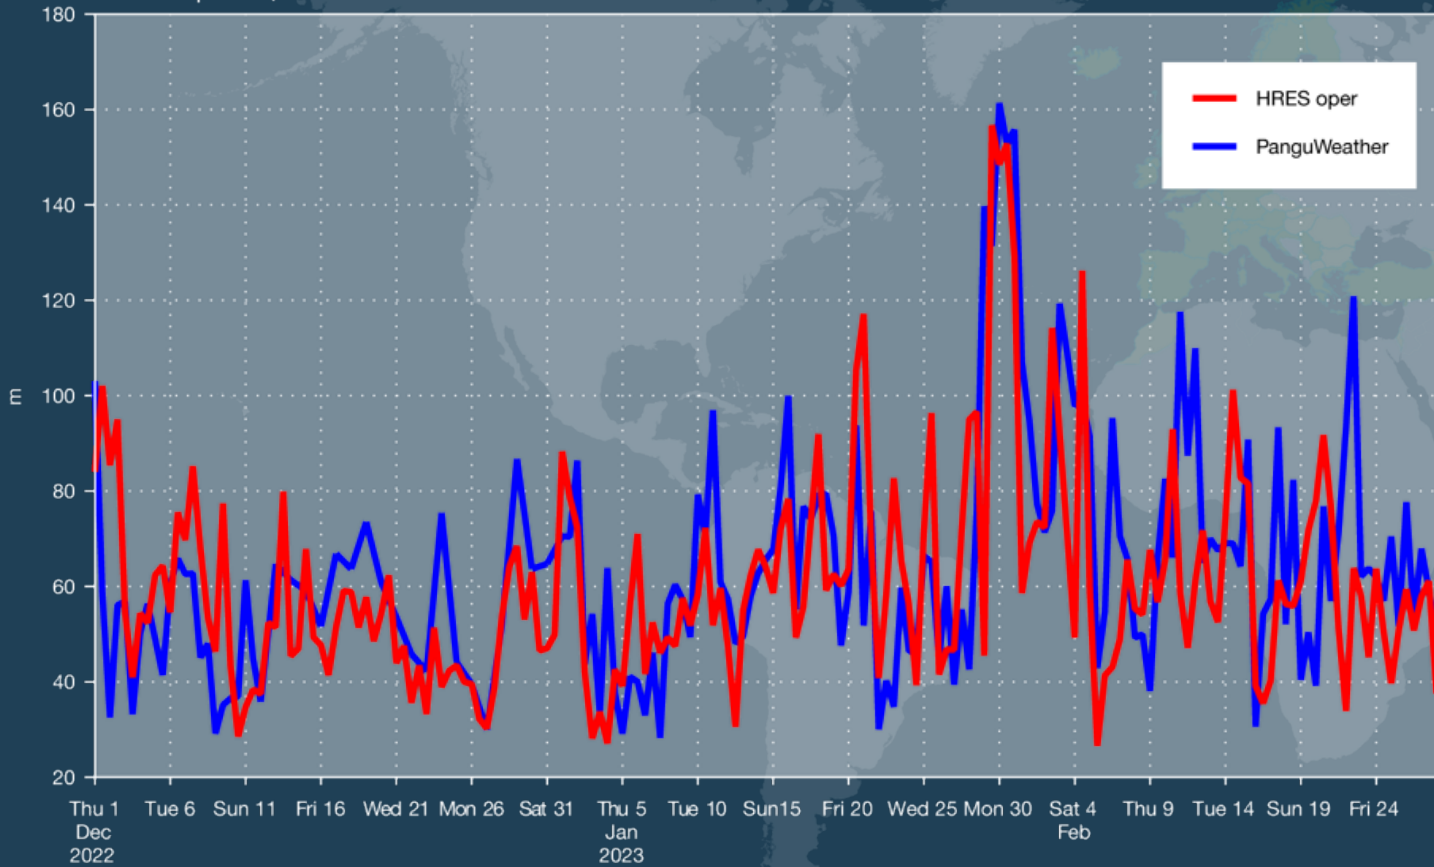

# Latest experiments: scores over a whole year

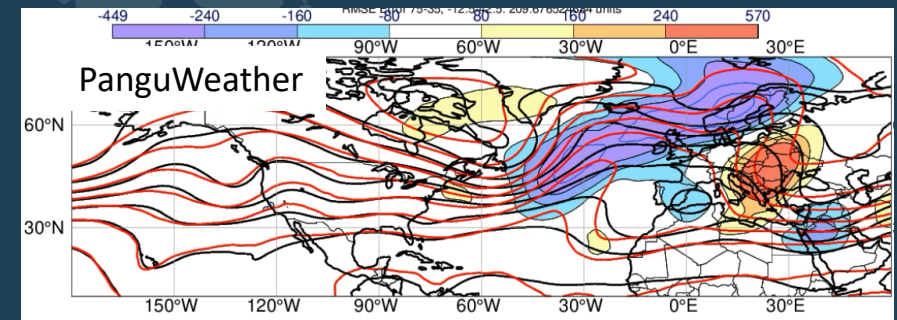

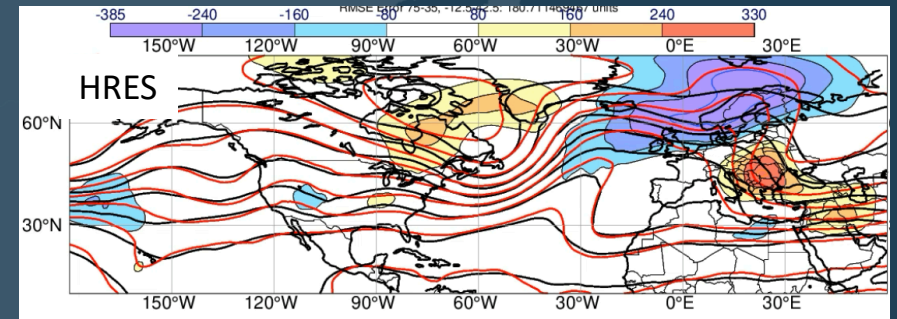

# What results are showing: Time-series of day 6, RMSE over Europe

Same starting point....Similar results

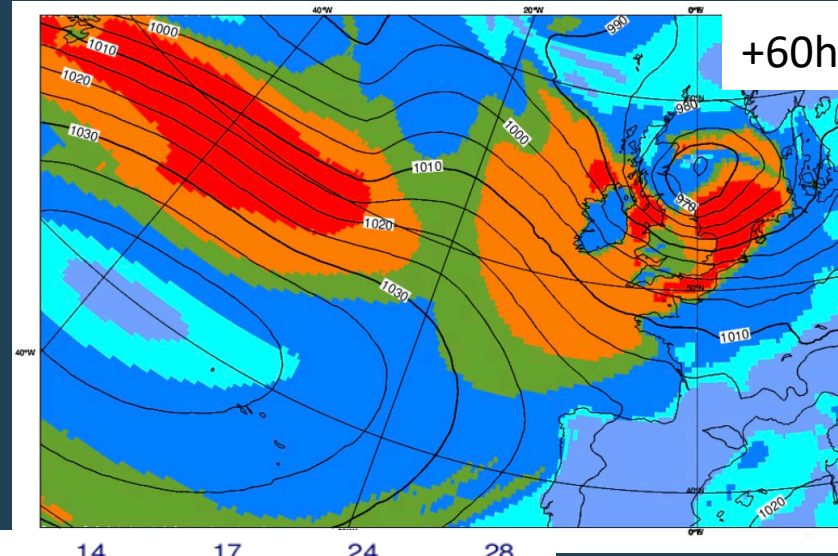

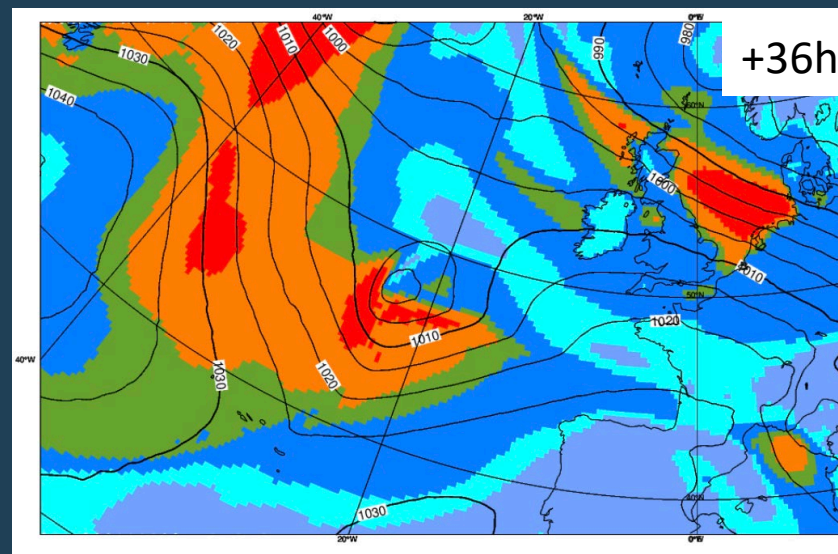

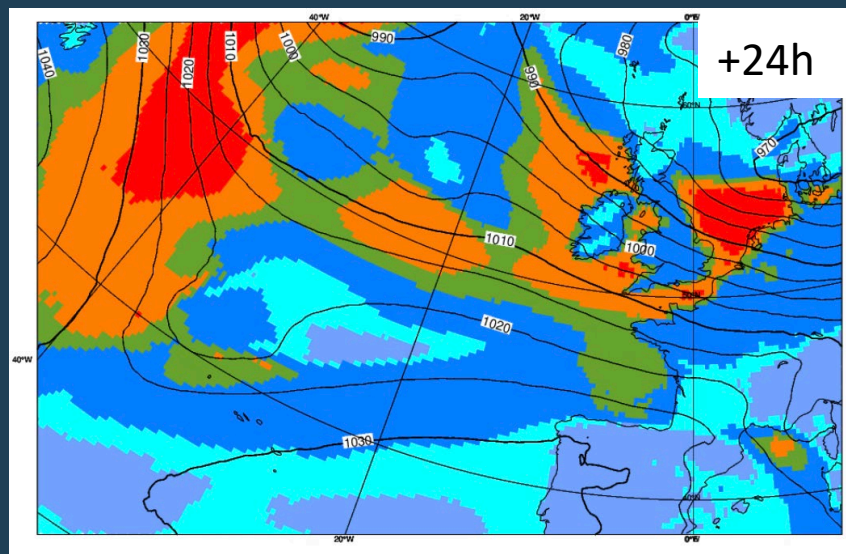

Root mean square error | 500hPa geopotential  
Europe  
T+144 | od oper 0001

+144h forecast errors 30 January 00UTC

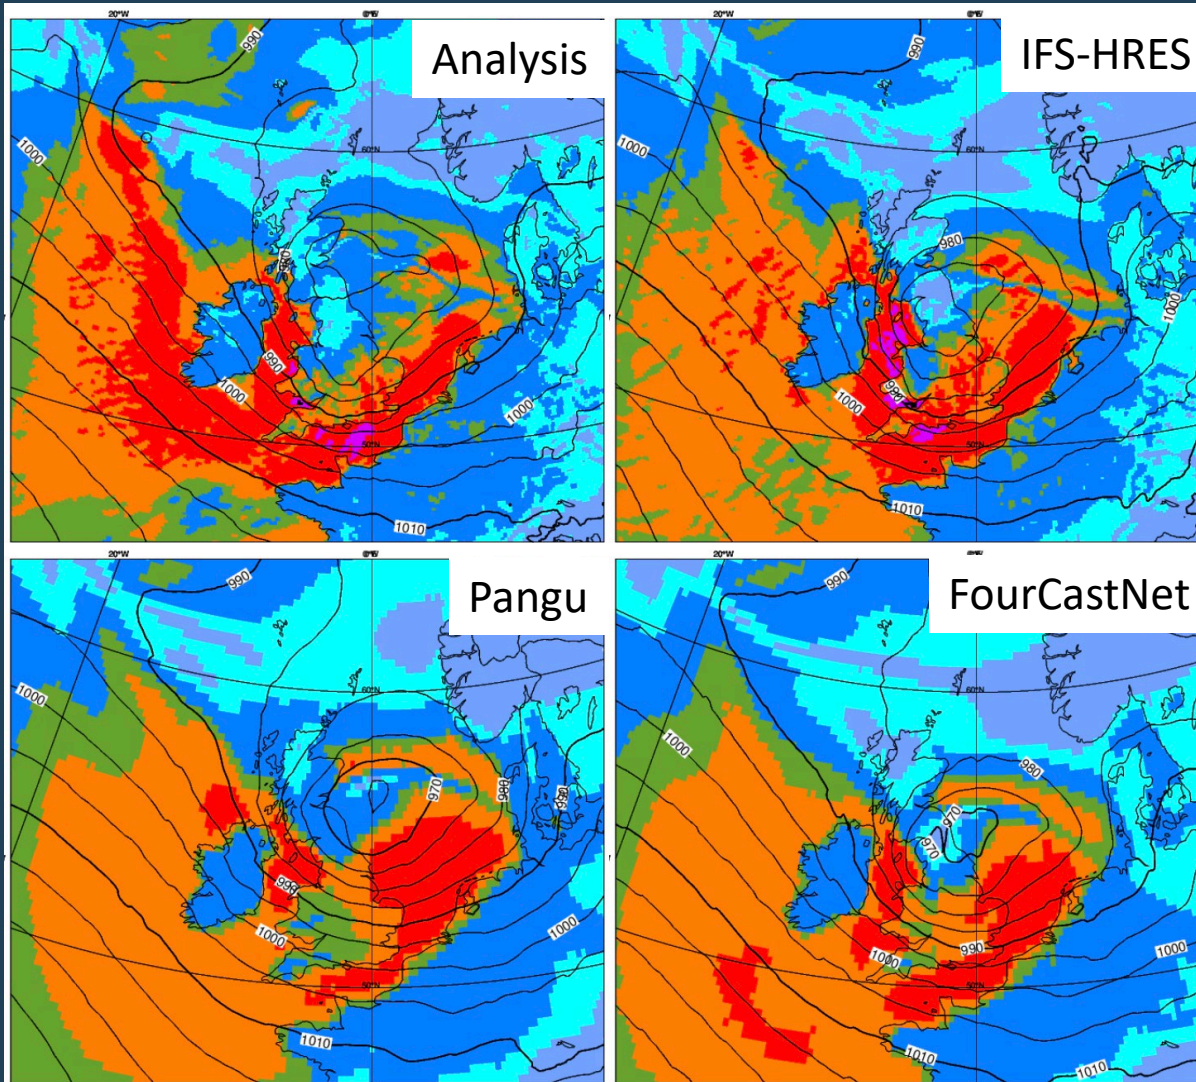

# PanguWeather: Storm Eunice (forecast from 16<sup>th</sup> Feb 2022 00UTC)

MSLP and wind speed from PanguWeather model

# What the forecasts are showing: Storm Eunice (2.5-day forecasts valid 18<sup>th</sup> Feb 2022 12UTC)

Maximum mean wind Heathrow 18 Feb (00, 06, 12 and 18UTC)

# What the forecasts are showing: Tropical cyclone Freddy (19 Feb 2023 00UTC)
